

Ocean Sensor Data

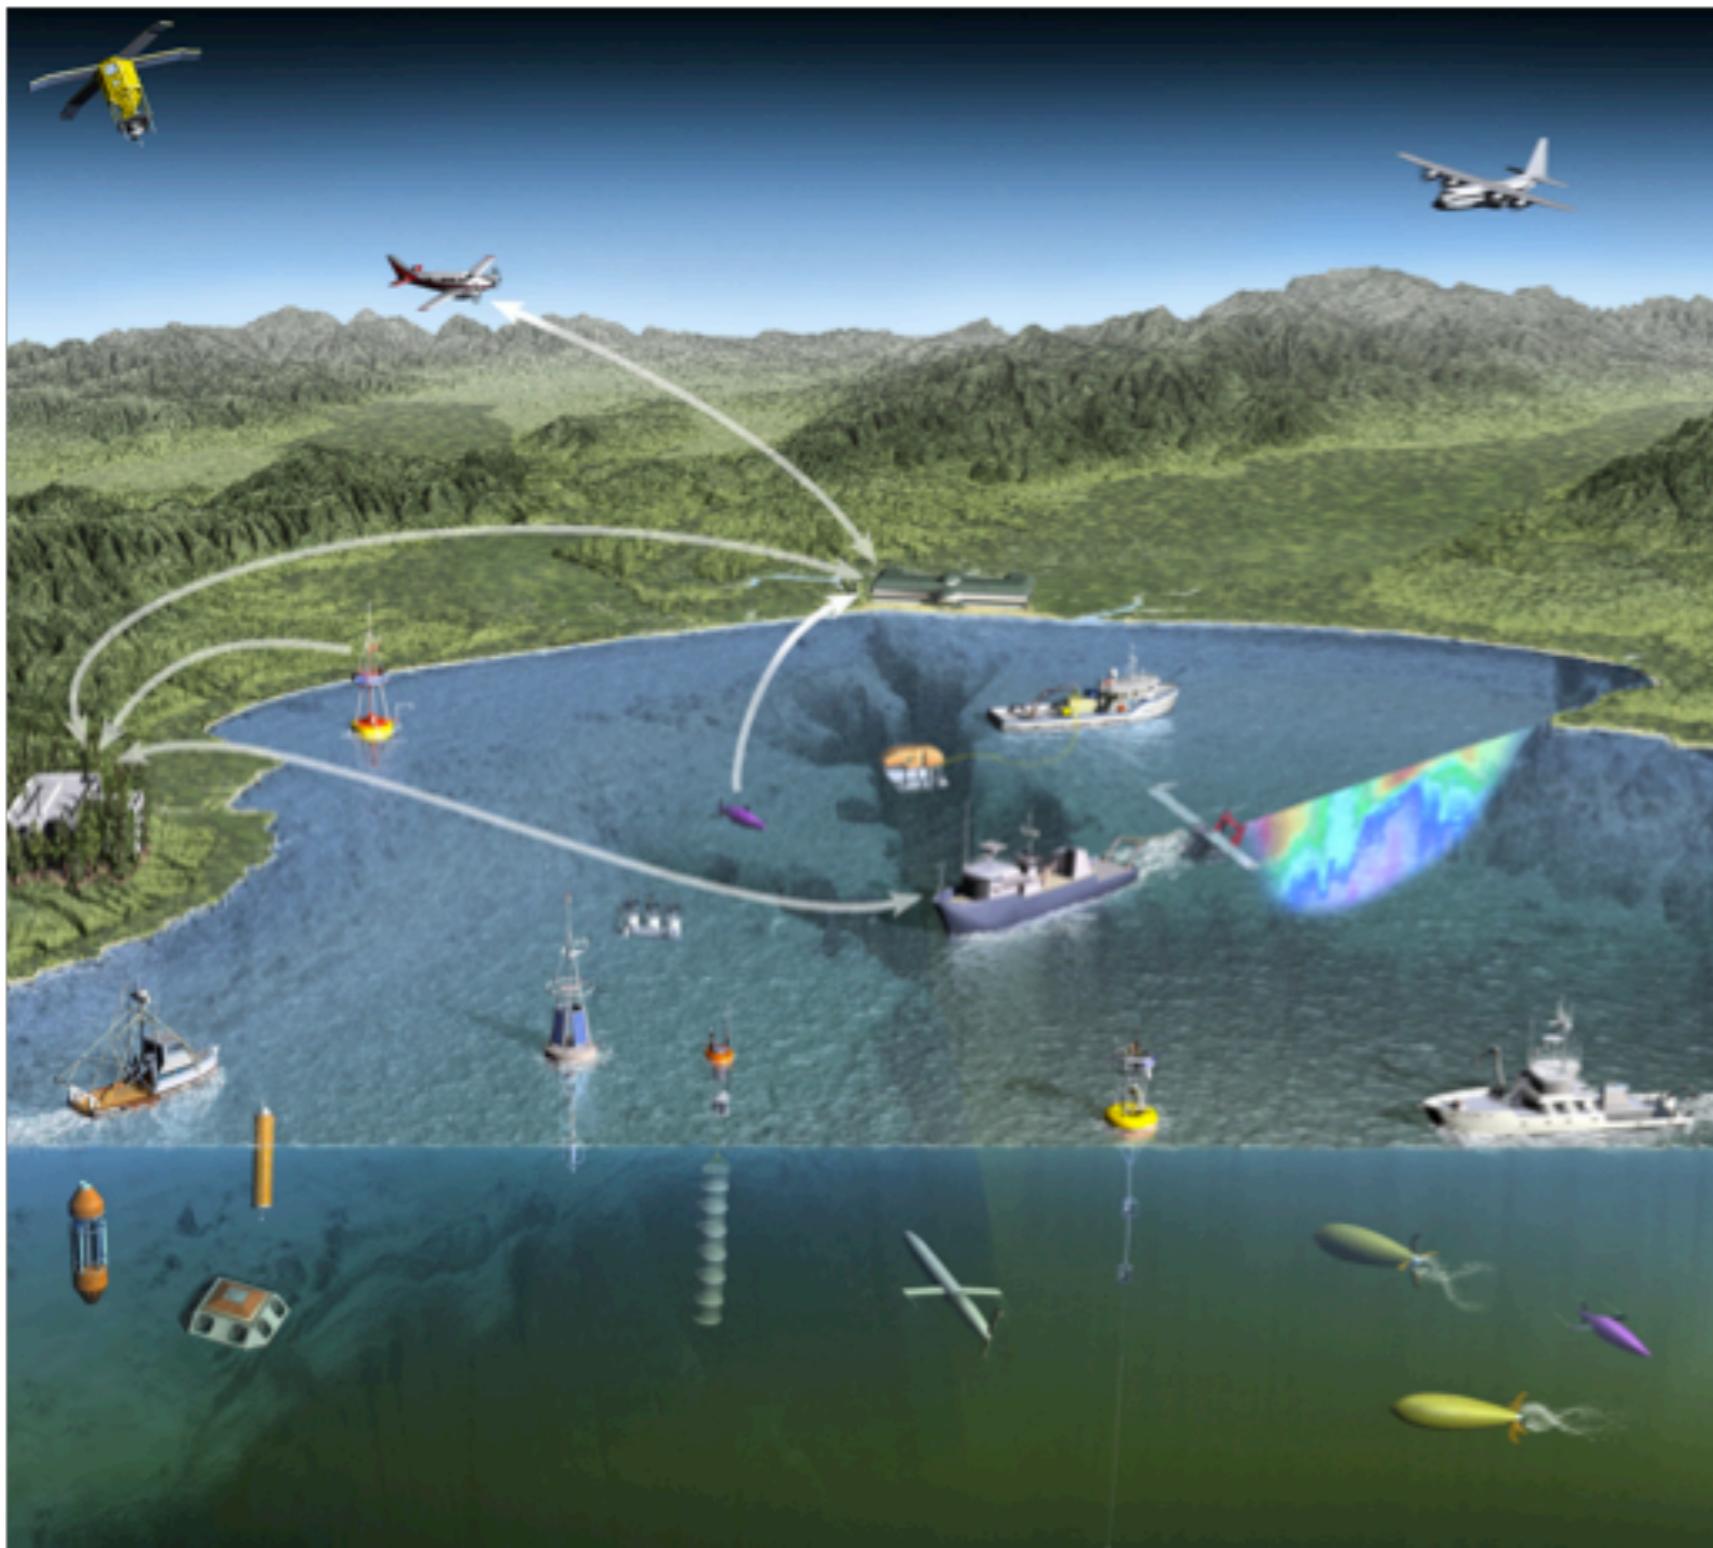

*Managing, Visualizing, and Understanding data using
STOQS*

16-17 September 2014
Environmental Disasters Data Management Workshop

Mike McCann
Monterey Bay Aquarium Research Institute

Oceanographic Observations

9/17/2013 2:17 pm

N

22.3 km

Data SIO, NOAA, U.S. Navy, NGA, GEBCO
Data LDEO-Columbia, NSF, NOAA
Data CSUMB SFML, CA OPC

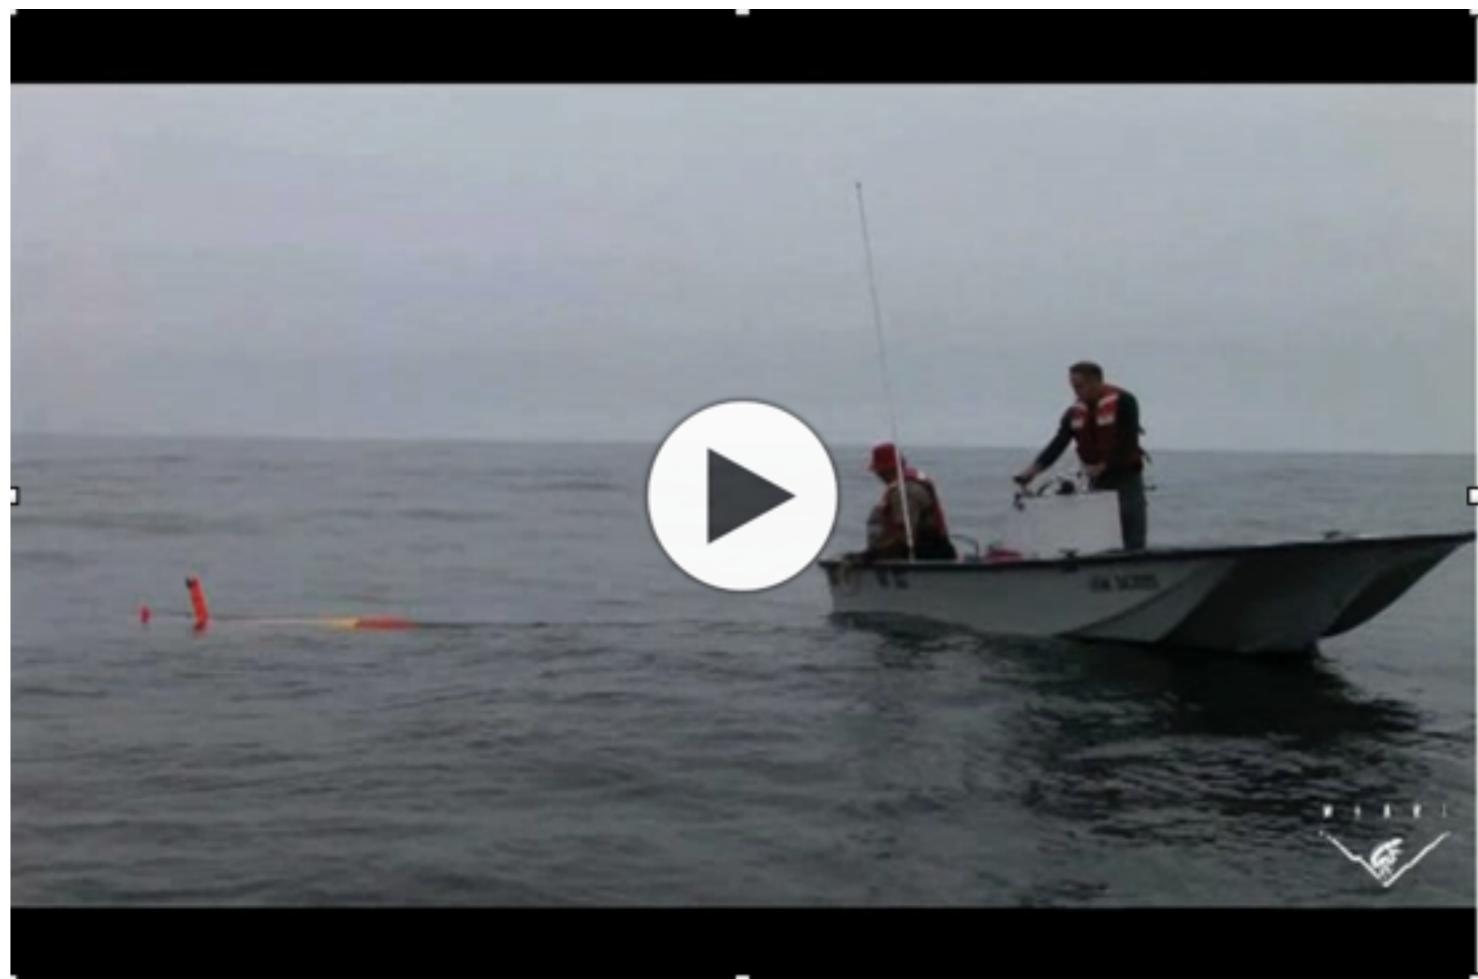

lat 37.001933° lon -122.822060° elev -1359 m eye alt 85.53 km

Google earth

Long Range AUV

- Mobile platform measures properties while moving through the water
- Seabird CTD, Wetlabs ECO, ISUS, Optode, ESP, ...
- T, S, optical backscatter, chlorophyll, fluorescence, DO, nitrate, genetics, ...
- realtime and delayed mode

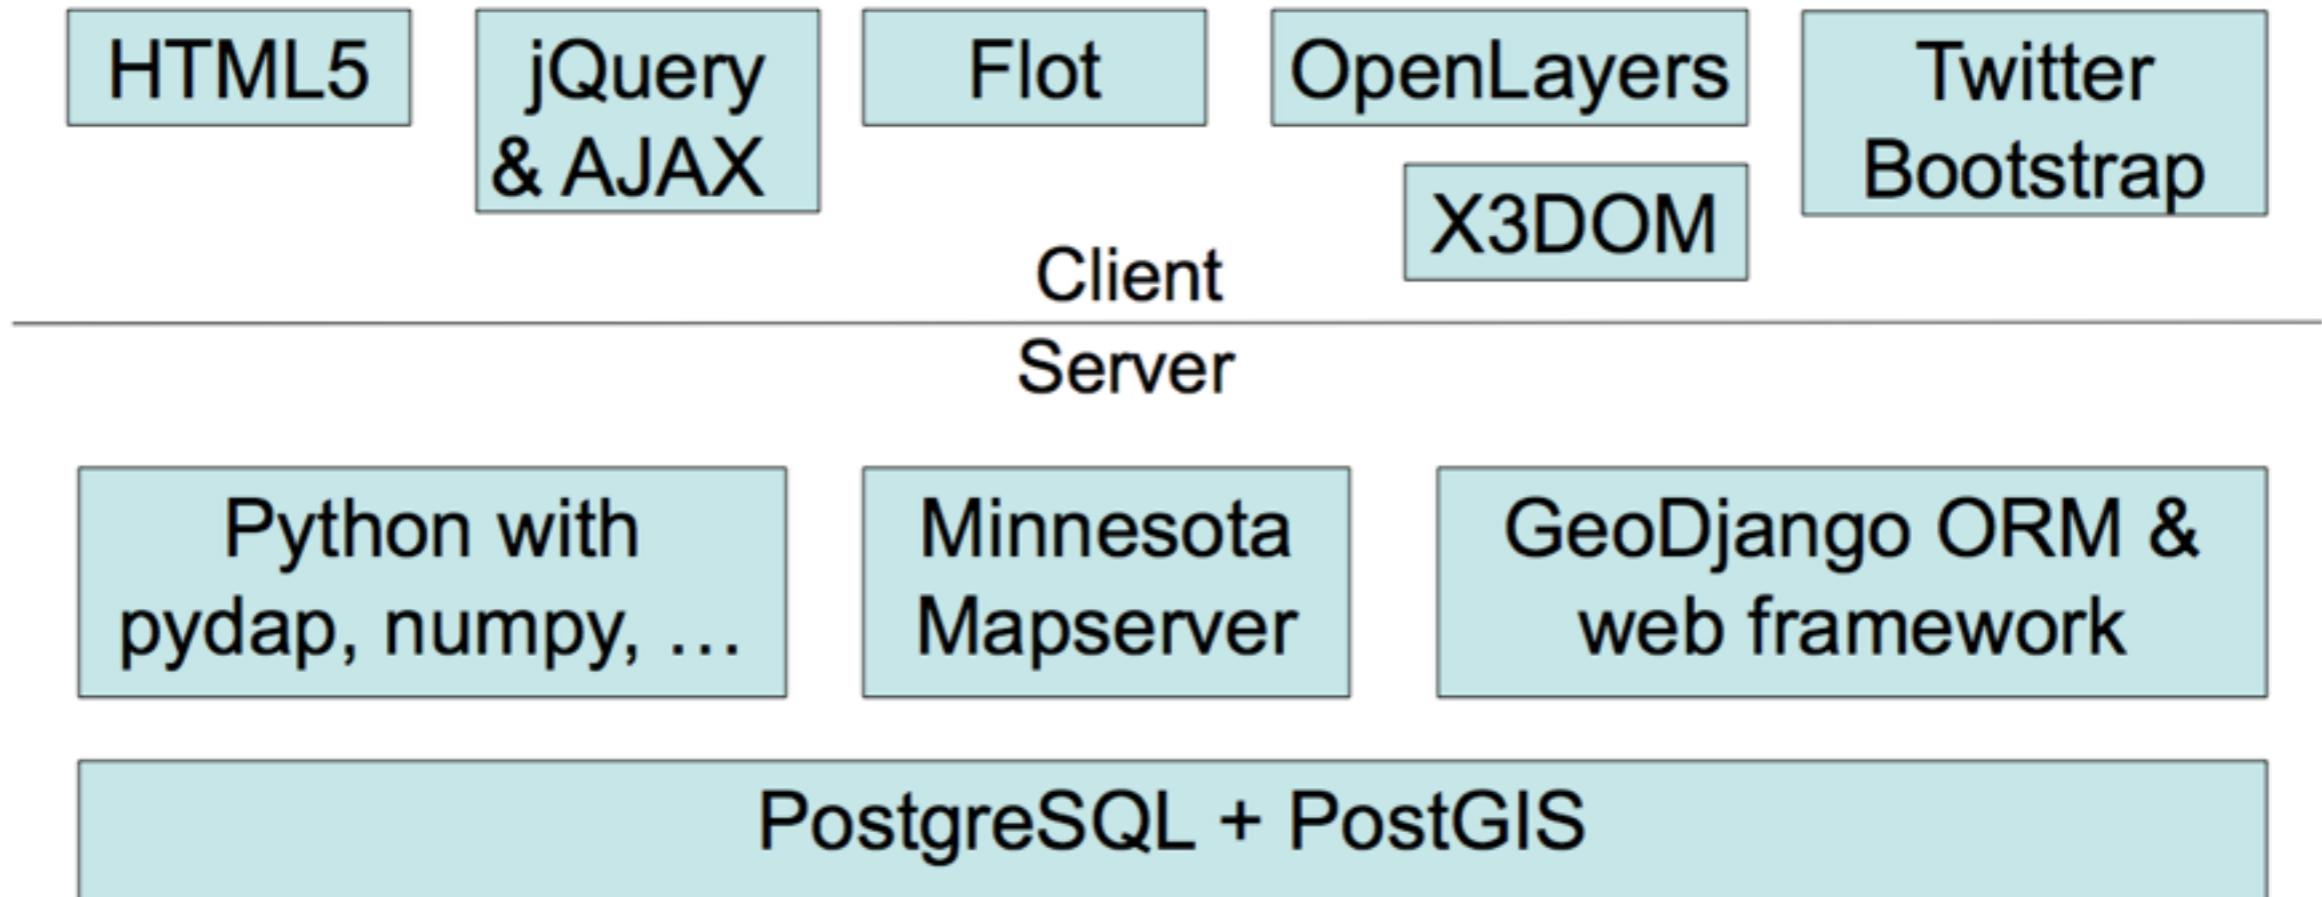

Workflow

1. Install STOQS from stoqs.googlecode.com
2. Conduct missions that collect data
3. Create CF-NetCDF 1.6 files of the data
4. Construct STOQS load script
5. Create PostgreSQL database and run script
6. Explore, visualize, and understand data

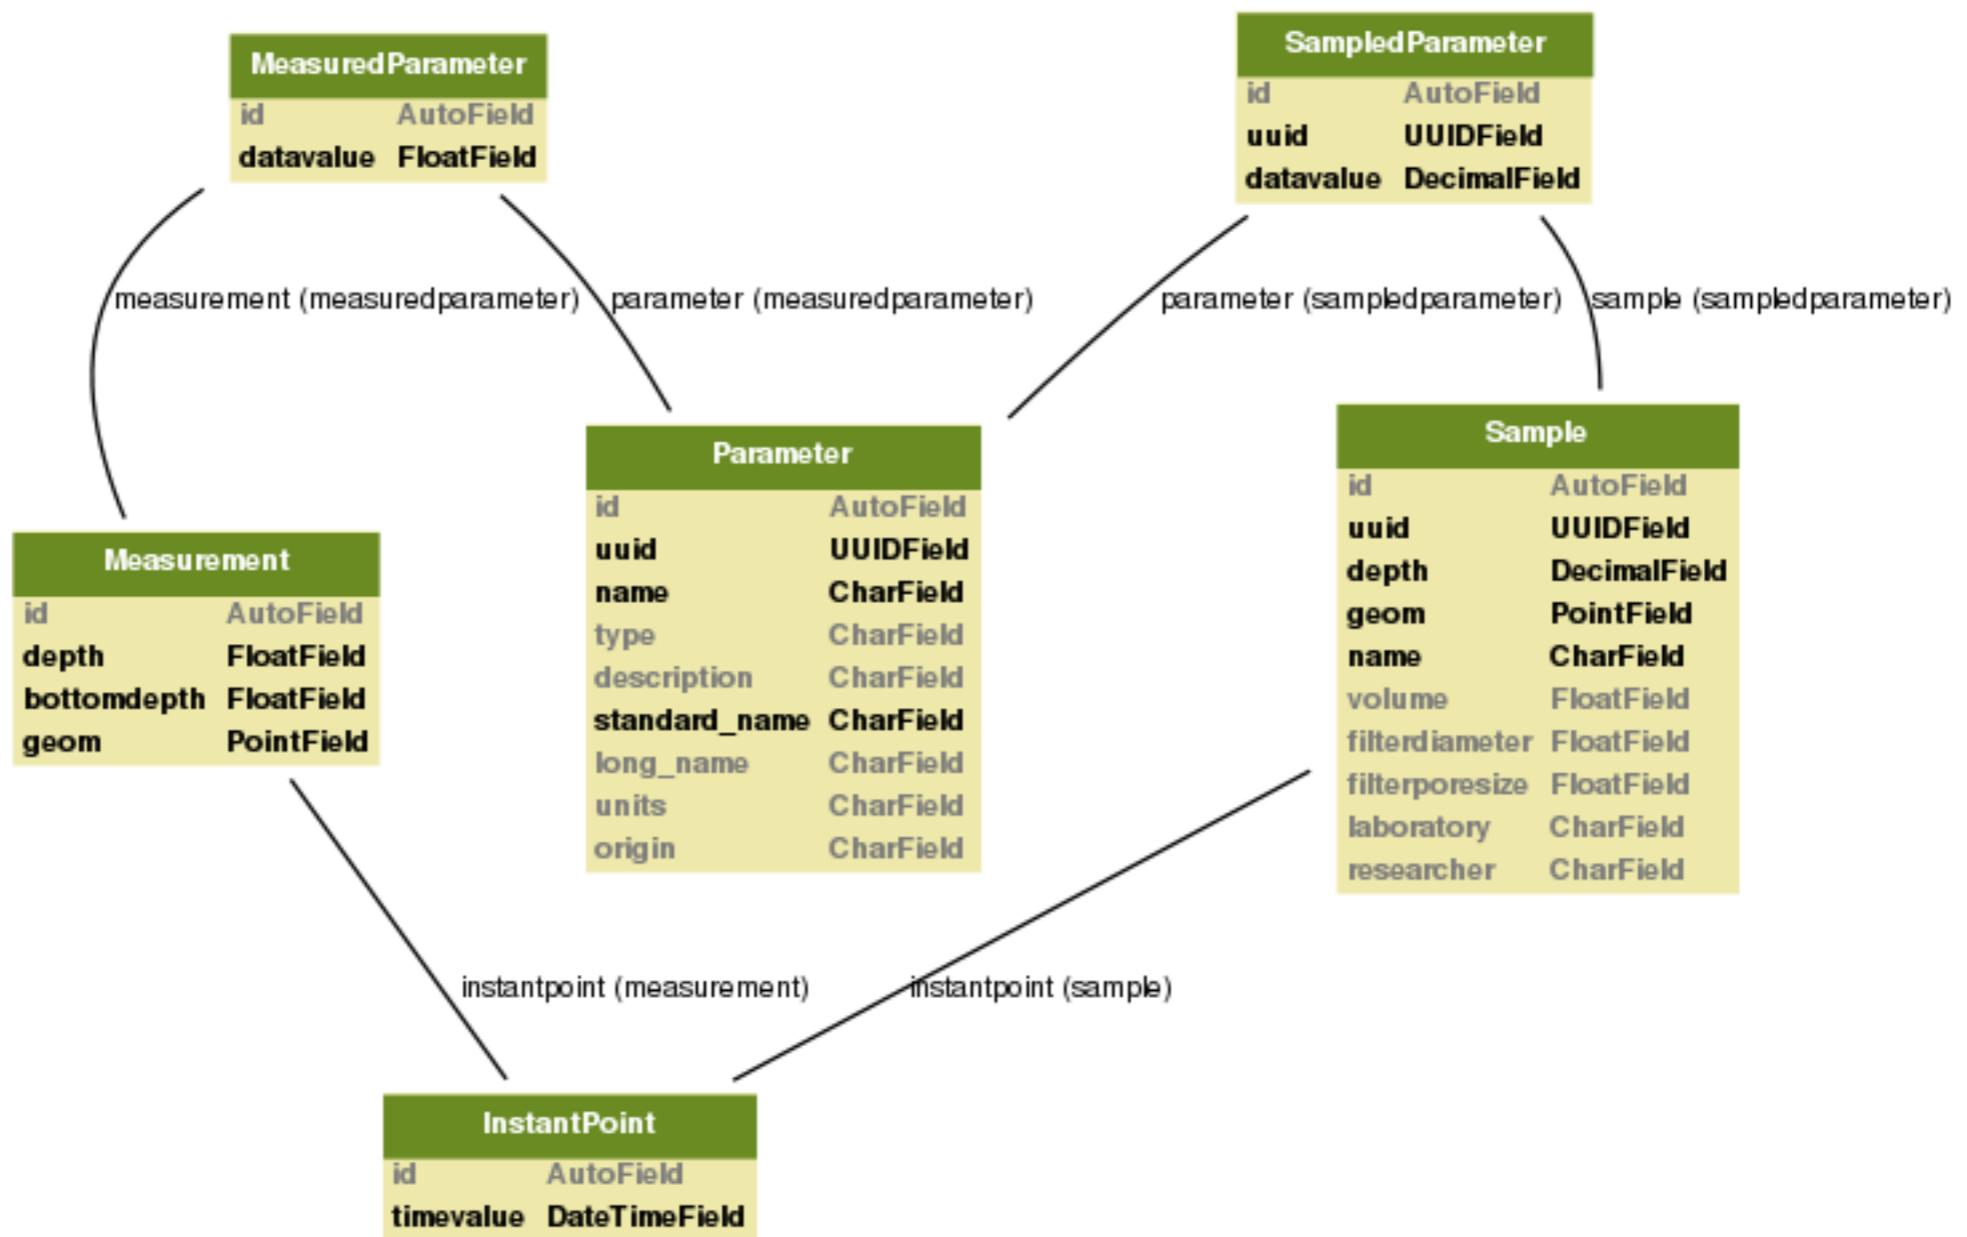

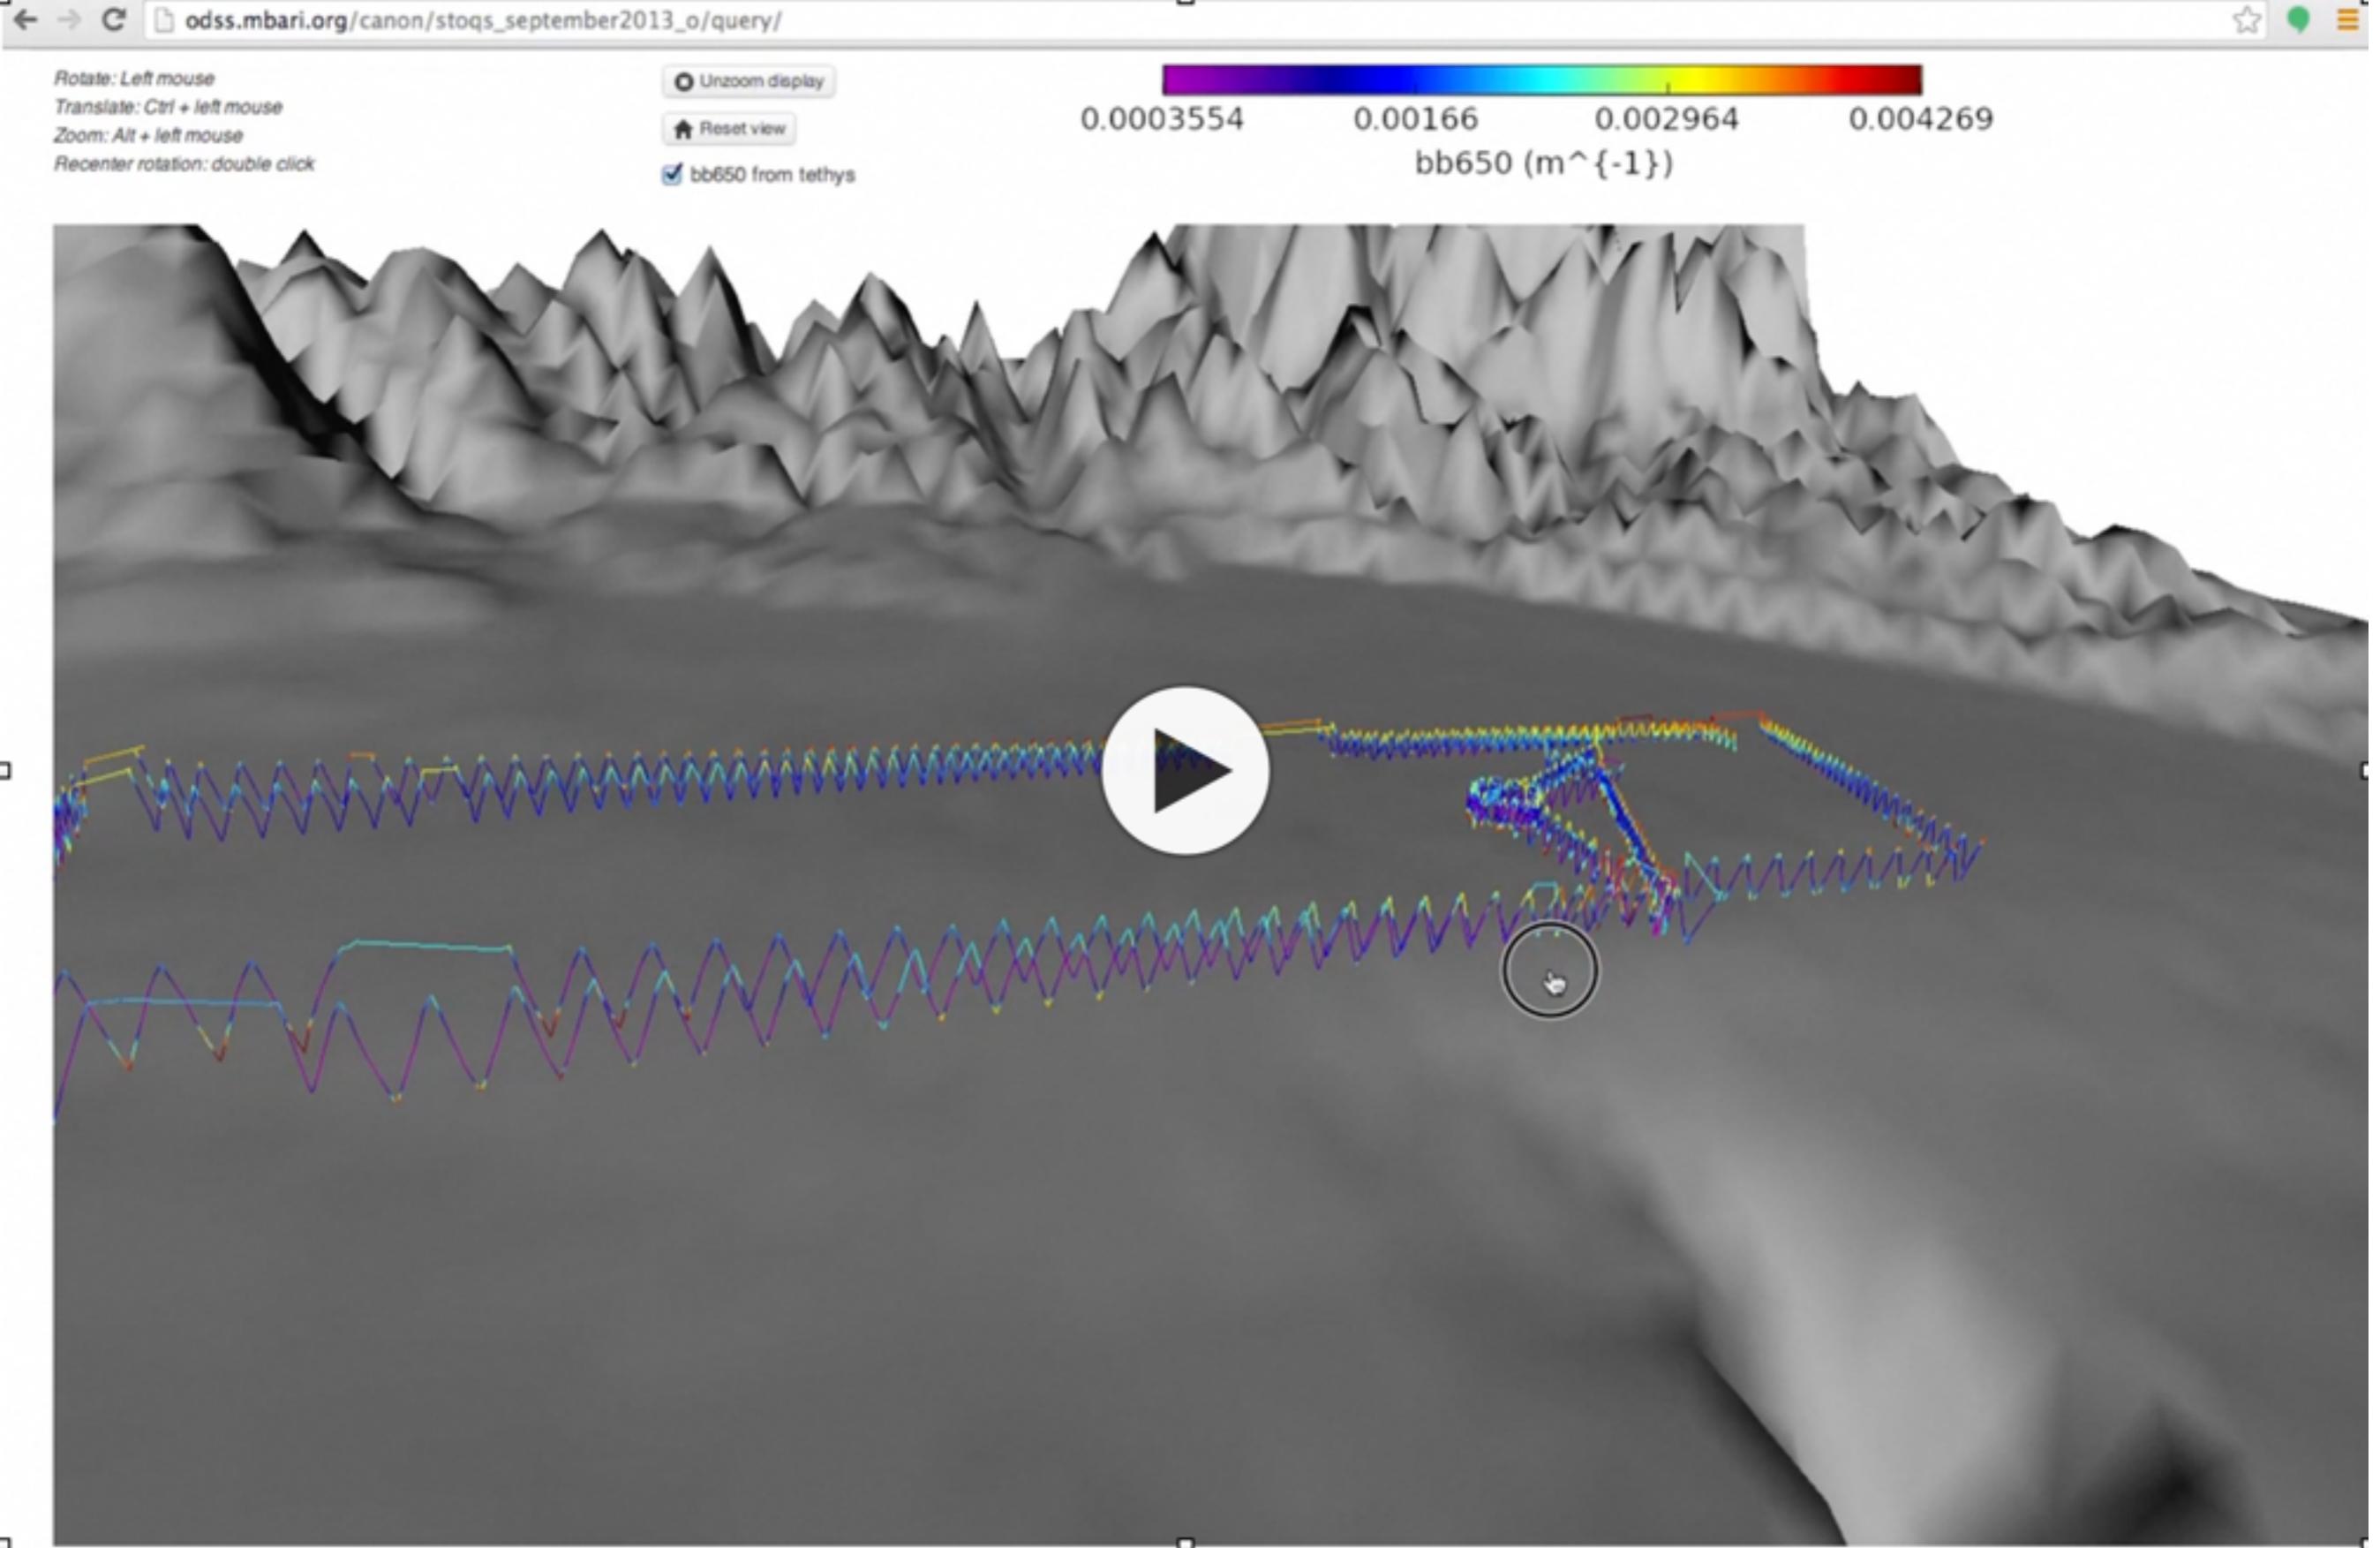

STOQS Architecture

All free and open source components

Relational Database

See video at stoqs.googlecode.com
