

ADIOS 3 LIBRARY

- THE GOOD, THE BAD, AND THE OILY
- Good:
 - I like the custom library functionality,
 - comment field
- Bad:
 - A rose is not a rose
 - Scollable lists are cumbersome and imprecise
 - Requires too much care and feeding
 - 15 to 1

Proposals

- Separate libraries into crudes and refined products
- Versatile data formats
 - Accept data from the spill (fresh and weathered)
- Wizard?
 - User enters what they know: API; x,x,z, Name
 - ADIOS makes the best match
